

## **Home Works** related to Lecture-01

**CSE-3215**

***(Data Communication)***

- # 1. Why data transmission is important in Computer Engineering? What do you think?
- # 2. Illustrate the difference between data alteration and duplication.
- # 3. Is data communication possible without a protocol? Why?
- # 4. Give an example of each of the both; wired data transmission and wireless data transmission.
- # 5. How Jitter is related to Timeliness? Explain.
- # 6. Differentiate between Latency and Jitter.

*Ahmed Salman Tariq*
